

# **Damaging Wind Threat Late Tonight**

Isolated Severe Storms Possible Today & This Evening

## **Key Messages**

- → Isolated thunderstorms are possible today, and similar to early this morning, locally strong winds and heavy rain would be the threats
- → Organized severe thunderstorms in Wisconsin this evening are likely to move into at least a portion of northeast Illinois and northwest Indiana between 11 PM and 4 AM.
- → Damaging winds will be the most likely threat with the storms if impacting the area, and there is a chance that significant winds (75+ mph) make it into the Chicago metro
- → Heavy rainfall with storms, so if any storm training on the periphery of the fast-moving line, there could be flash flooding

Severe Weather Threat

## **Next Scheduled Briefing**

➔ Additional briefings will be issued by 3:30 PM this afternoon.

### July 28, 2021 8:06 AM

Chicago, Illinois

### Line of storms likely to reach here late tonight, but may be weakening

Chicago, Illinois

# Severe Thunderstorm Threat Today

### **Tornado Safety - Know Where to Go**

- Confidence is high in a line of severe storms in Wisconsin this evening that will track southeast, potentially bringing significant severe wind damage
- However, uncertainty is high on the • exact track, and that will influence the threat magnitude
- Northeast IL (including Chicago • metro) and far northwest IN are likely to see at least some storm impacts
